ComfortPlus™ Translucent

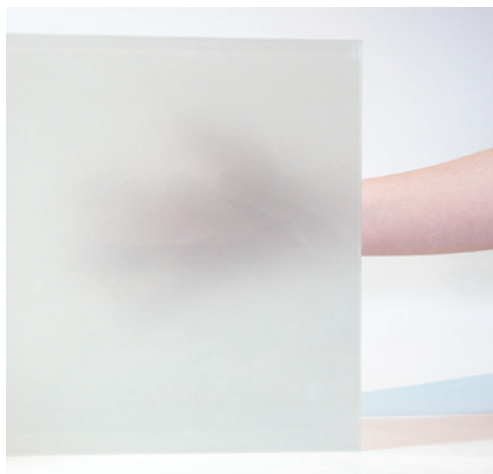

Providing solar control, insulation and privacy in a single glass

ComfortPlus™ Translucent represents an extension to the ComfortPlus™ range. The product combines the benefits of solar control, insulation and privacy. Initially ComfortPlus was designed as a residential range of Low E laminates. Over time, ComfortPlus has been used increasingly in commercial applications.

Description

The trend towards greater urban density and infill housing developments is driving demand for building products that help address the concerns for privacy and overlooking issues.

'Overlooking' is an important consideration when building or renovating. It's where the living space of one property overlooks the living space of another property.

Obscure glass, such as ComfortPlus™ Translucent, is provided as an option for addressing overlooking issues in compliance to building regulations.

Features and benefits

- ◆ Obscure glass providing privacy and performance benefits of Low E glass
- ◆ Provides access to natural light where 'overlooking' design considerations may prevent the use of a clear glass
- ◆ Now part of standard product range, making it easier to specify and purchase
- ◆ Grade A Safety Glass as standard
- ◆ Blocks 99% of unwanted UV light

Applications

- ◆ Apartments
- ◆ Retail
- ◆ Office buildings
- ◆ Institutional and social buildings
- ◆ Hotels
- ◆ Where solar control, insulation and privacy are required in a single glass

Maximum size

- ◆ 3660 x 2440mm

How to specify

- ◆ **Select glass name**
Viridian ComfortPlus Translucent
- ◆ **Select thickness – process**
6.38mm or 10.38mm Translucent

Performance comparison chart

Product	Insulation	Solar	Daylight
6.38mm ComfortPlus™ Translucent	3.6	0.56	62
10.38mm ComfortPlus™ Translucent	3.6	0.53	60
