

DuraClean™

Coated shower screen

Residue resistant

Highly transparent

DuraClean™

It's what you don't see that makes DuraClean™ the obvious choice for shower screens.

Unlike standard glass, it's micro-coated with metal oxides that make water slip over its surface. The coating is colour neutral and durable, reducing residue build up, making cleaning a breeze and keeping your shower screen looking clear and bright with reduced haze.

A clear advance in glass manufacturing.

DuraClean™ is manufactured by depositing an anti-corrosive coating on one side of an extremely clear glass – a treatment that maintains its effectiveness over time. As the coating is virtually invisible, DuraClean™ remains highly transparent and does not alter colour perception, regardless of its thickness.

A clean winner.

As with any bathroom surface, DuraClean™ will benefit from regular cleaning. Where it differs, however, is that it won't need elbow grease or fancy cleaning products to get the job done – all it takes is a simple wipe with a soft cloth or squeegee.

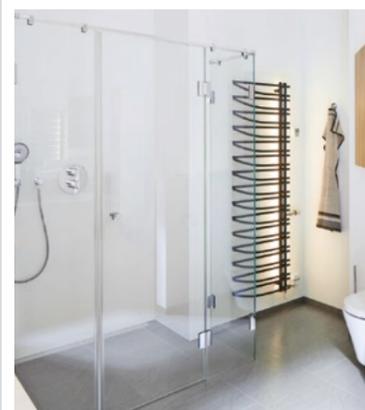

Wherever water falls.

DuraClean™ is suitable for bathroom applications in residential, multi-residential and hotel settings, and can be used on shower screens, bath screens and shower cubicle walls.

Toughening and processing.

DuraClean™ is able to withstand all the most common forms of glass processing, including cutting, edgeworking, curving (up to 1m radii), screen-printing and lamination.

Toughening activates the anti-corrosive properties of DuraClean™, so the product must be toughened to the relevant standard before use.

Guaranteed to make a lasting impression.

Shower after shower, year after year, DuraClean™ will minimise limescale and other unsightly marks that typify untreated glass shower screens. Its anti-corrosive properties even come with a unique 10-year warranty.

Easy installation.

You can install DuraClean™ just as you would any other shower glass of the same thickness – just ensure its coated side faces into the shower enclosure. For advice and information on handling DuraClean™, simply contact your local Viridian representative.
