

LuminaMist™

Laminated translucent glass

Creates visual privacy

Diffuses natural light

LuminaMist™

Designed to satisfy the usually competing needs of privacy and natural illumination, LuminaMist™ is perfect for screening and decorative applications in a wide variety of commercial and domestic settings.

LuminaMist™ is a hard-wearing, low maintenance laminate comprising two sheets of clear glass bonded together with either a translucent or translucent grey interlayer.

Separate without isolating.

LuminaMist™ redefines the concept of private space. Sufficiently opaque to obscure visibility, yet translucent enough to enable high levels of natural light transmission, it creates sophisticated screening solutions that separate without isolating.

The two available options – Translucent and Translucent Grey – offer differing levels of visual obscurity and illumination. LuminaMist™ Translucent has a light transmission of 68% and Translucent Grey a light transmission of 32%.

LuminaMist™ offers improved levels of noise reduction compared to ordinary glass.

The images shown are a representation only of the product. Colour and effect may differ. Always refer to a sample to determine if product is appropriate for your requirements.

Enlightened illumination.

It's not only the quantity of transmitted light that makes LuminaMist™ such an attractive solution, it's also the quality. Uniformly frosted in appearance, it creates a sublimely diffused illumination suitable both for functional applications, and creating a particular ambience or sense of place.

Practical advantages.

The beauty of LuminaMist™ extends beyond functional and aesthetic value – being a laminate, this is a practical choice for a wide range of applications.

The translucent PVB interlayer blocks out 99% of unwanted UV light – protecting furniture from fading. As its interlayer is shielded from touch, LuminaMist™ is also far less susceptible to finger marks, making it easier to maintain.

Surprisingly versatile.

The properties of LuminaMist™ make it an obvious choice for domestic privacy applications such as shower screens, balustrades, windows and door inserts, as well as commercial applications, like partitioning.

What may surprise, however, is that LuminaMist™ is an in demand solution for roof lighting, as it transforms even the harshest midday sunlight into a source of gentle, even illumination.

You can also write on LuminaMist™, just as you would a wipeable whiteboard, and even use it as projection screen. Add to that its privacy and maintenance benefits, and LuminaMist™ may just be the best, most versatile office partitioning available.

Translucent

Translucent Grey

Strong, safe and durable.

LuminaMist™ is a laminated Grade A Safety Glass. Stronger and more durable than comparable single glazing, it can be used with absolute confidence in a wide range of internal and external applications. In the event of breakage, fragments adhere to the PVB interlayer and are retained in place, making it ideally suited to high traffic retail and commercial environments.
