

PRODUCT

VLam™ Translucent

Translucent laminated glass – for low maintenance privacy and soft daylighting

Everybody likes a little bit of alone time every now and then, so you can ensure the private areas of your space stay that way with VLam™ Translucent.

With a stylish frosted appearance, VLam™ Translucent is durable, reliable and designed to secure your privacy.

VLam™ Translucent provides a frosted appearance made by bonding two sheets of glass together with a translucent PVB interlayer. The result is a durable glazing material that can

be used for a variety of applications.

As the translucent interlayer is contained between the two sheets of glass, the product does not finger-mark and is easy to clean.

Where privacy is an important consideration, this product is appropriate for obscuring vision and diffusing light.

VLam™ Translucent has an opaque appearance and a light transmission of 68%.

VLam™ Translucent Grey has a frosted grey appearance and a light transmission of 32%.

VLam™ Translucent SuperClear™ has a premium frosted appearance and a light transmission of 70% (10.38mm).
