

PRODUCT

JailGuard™

Specialist security laminate – specially designed for use in correctional facilities

As the name suggests, JailGuard™ is specialised security glass that is tough enough to meet the standards of correctional facilities.

JailGuard™ is designed to resist attacks from all the typical hand tools that might be found within correctional facilities such as police stations, jails, remand centres and more.

JailGuard™ products are manufactured using a variety of glass types and thicknesses combined with high-end security interlayers. JailGuard™ can also incorporate low spall films if required.

Products within the JailGuard™ range are designed to withstand a variety of attacks from hand tools and typical implements such as brooms, mop buckets, billiard balls and other objects found within correctional institutes. Simulated attack conditions using axes, wood splitters, crowbars and other hand tools have shown products within the JailGuard™ range capable of resisting penetration for extended periods.

JailGuard™ is available in different levels of security:

JailGuard™ 10

JailGuard™ 20*

JailGuard™ 30

*Formerly JailGuard™ 22

Features and Benefits

- **JailGuard™** is independently tested. Test data and video results are available for review.
- Conforms to AS/NZS2208 for safety glazing material.
- May be specified in a choice of configurations – Clear, Toned, Low E and **DécorMirror™ Oneway** (subject to configuration and attack level).
- Can be used for both internal and external applications.

Applications

- Windows
- Doors
