

Viridian ClimaTech™

Double glazing that's built for everyday Australians

We all understand the importance of insulation, it has been installed in our walls and ceilings for a long time to keep us comfortable all year round. You wouldn't build or renovate without insulation, so why do we compromise when it comes to windows?

Have you considered double glazing? For those building or renovating and thinking about their family's comfort and the longevity and long-term value of the home, we have designed Viridian ClimaTech™ double glazing.

Turn over to learn about the benefits.

For more information on Viridian ClimaTech™ visit www.viridianglass.com/climatech

ViridianTM
we ♥ glass

We have created Viridian ClimaTech™ to ensure all Australians can access flexible double-glazing options which increases energy efficiency, access to natural light and long term home comfort.

Viridian ClimaTech™ is available for standard window designs.

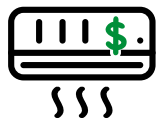

Don't sacrifice window size by selecting standard single glass, larger windows with double glazing creates brighter and comfortable homes.

For more information on Viridian ClimaTech™ visit

www.viridianglass.com/climatech or speak to your builder or window team.

If you require added insulation and acoustic benefits we also recommend you explore Viridian's **LightBridge** and **LightBridge next™** product ranges.

To find out more about double glazing and glass selection for homeowners visit our blog, www.viridianglass.com/blog or follow us on Facebook or Instagram.

**Reduce heating
& cooling costs**

**Compliance and
performance**
