Created to inspire

Unlimited inspiration

The PixaGraphic™ Natural Elements range is the result of unique graphic design techniques, a sophisticated mix of the highest quality ceramic inks and Viridian's manufacturing expertise.

Showcasing carefully selected unique designs replicating the natural beauty of stone and timber, PixaGraphic™ Natural Elements is redefining the possibilities for surface design.

With innovative designs to compliment equally the living space and working environment, the range brings versatility and

inspiration to all internal glass applications.

Whether you are looking to design a glass partition, shower screen, dividing wall or splashback, PixaGraphic™ Natural Elements digital ceramic glass printing can help transform your design concept into an architectural reality.

Versatility in every dimension

To achieve a specific surface size and proportion, a printed image can be applied to one individual glass panel or by using multiple panels aligned to create an image of any scale.

The PixaGraphic™ Natural Elements range are images not vector patterns and as a result the designs have maximum print sizes.

High durability

PixaGraphic™ is manufactured using the highest quality ceramic inks, offering a diverse range of performance functions.

Applied to the glass surface through precise micro-dot printing using the latest digital printing technology, ceramic ink becomes fused to the glass itself during our carefully controlled toughening process.

This forms a permanent, durable surface which is highly resistant to scratches, colour fading, UV and chemicals. It also ensures each piece of PixaGraphic™ meets Grade A safety glass requirements of AS 2208.

Essence of the forest

With its natural wood grain finishes in a wide range of colours, the essence of the forest collection delivers a durable solution and modern uptake on a timeless classic.
