Pattern Catalogue

Vector patterns for PixaGraphic™

Featuring a number of designs created to showcase a range of solutions for shading, privacy or decorative purposes, the PixaGraphic™ vector pattern catalogue is organised to make the selection process as simple as possible.

Highlighting vector designs which match the digital ceramic printing process perfectly, the outstanding results reveal a timeless quality and level of detail not easily matched by alternative glass printing methods.

Abstract

The abstract collection uses a range of shapes and lines to achieve the elements from an object without being truly representational. A modern look inspired by Kandinsky and the abstract art movement. Its versatile style and simplified form creates an avant-garde impact wherever it's used.

Fusion

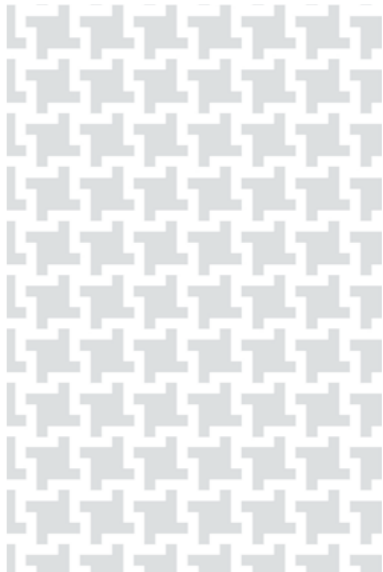

As the name suggests the fusion collection features a series of shapes and lines fused together to form intricate patterns. The interwoven appearance adds an element of depth and creates a dynamic edge.

Geometric

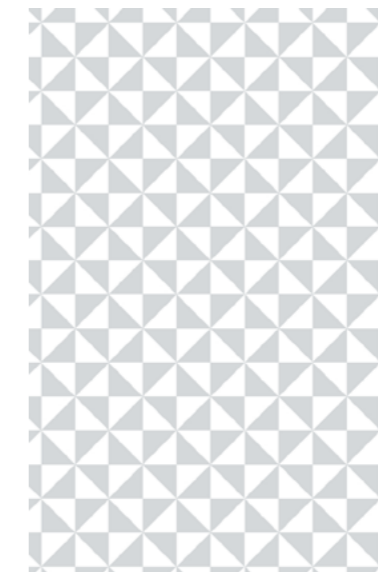

The geometric collection features repetitive sharp lines and basic angular shapes to form a cohesive pattern. The diagonal lines add dimension to the glass giving it depth and creating visual interest.

Organic

Inspired by nature and earth's surfaces, the organic collection features flowing lines and shapes found in stones, water, sand and trees. Its loose and curving lines evoke a calming sense.
