# Seraphic™ Spandrel

## Ceramic painted spandrels

**Seraphic™ Spandrel is our range of ceramic painted glass that is ideal for external facades, wall cladding and spandrels.**

Experience the harmony of creativity and durability with Seraphic™ Spandrel, where architectural brilliance meets unparalleled aesthetics. The future of exterior excellence awaits.

Seraphic™ Spandrel not only has an opaque appearance and excellent hiding properties, but it is low maintenance and has superior resistance to heat when compared to annealed or laminated glass.

Seraphic™ Spandrel is also an ideal solution for internal decorative glass cladding such as internal wall paneling, lift shaft paneling and lift walls.

### Features and Benefits

- Only environmentally friendly lead free ceramic coatings are used.
- Very durable and scratch resistant coating which will not crack from temperatures of up to 250°C.
- The UV resistant coating is permanently fused to the glass surface during the toughening process.
- Optimal lead-times compared to traditional ceramic products.
- When toughened, Seraphic™ Spandrel is a Grade A safety glass.

## Considerations

### Design Considerations

- Not recommended for all over colour applications where the panels will be backlit.
- Available only in the colour range outlined.

### Installation

- The coated surface must be glazed to the inside of the building.

## Sectors

- Residential
- Commercial

## Applications

- Facades
- Spandrels
- Interior Wall Panels

## Product Range

Deep Black

Anthracite Grey

Zen Grey

## How to Specify

- **Select glass processor**  
Viridian Glass
- **Select glass name**  
Seraphic™ Spandrel
- **Select tone & thickness**  
See chart below.
- **Select processes**  
Toughened, heat soaked and insulated glass unit.

## Standard Stock Sizes

Product Name	Thickness	Stock Size
Seraphic™ Spandrel – Deep Black	6mm	5100mm x 3210mm
Seraphic™ Spandrel – Anthracite Grey	6mm	5100mm x 3210mm
Seraphic™ Spandrel – Zen Grey	6mm	5100mm x 3210mm
